- SQL
- HTML5, CSS3
- Adobe Photoshop, SAI
- Git, GitHub
- English B2

ABOUT ME

My name is Inga, I'm interested in programming, marketing, foreign languages, some kind of drawing and art at all. It's will be quite interesting to find a job in these fields. I'm ready to solve different exiting tasks, work with cool projects, learned something new and devote all my time to study. Will be using the technical and problem-solving skills I've developed via studies.

I can say that I'm very self-orginizing and cheerful person with great communicate skills, it's easy to me to integrate into the team and adapt here. It also won't be difficult for me to work in multitasking mode and I use Internet resources really good.

EXPERIENCE

Gifts shop
Java + SQL   2023 – April
https://github.com/ingarondel/gifts_shop

App for the gift shop administrator.

Bus Schedule
C++   2021 – December
https://github.com/ingarondel/trpo

A console application that contains a bus schedule. It can be used by both employees of logistics companies and ordinary users. Implemented login on behalf of the user and the administrator.

Simple tasks
C++   2021 – September
https://github.com/ingarondel/SW

Easy tasks in C++ at the beginning of study.
